**Copyright**

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities all the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the publisher; and that the manuscript will not be published elsewhere in any language without the consent of the copyright holders.

Manuscripts must contain a statement to the effect that all human studies have been reviewed by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in an appropriate version of the 1964 Declaration of Helsinki. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. Details that might disclose the identity of the subjects under study should be omitted.

Reports of animal experiments must state that the "Principles of laboratory animal care" (NIH publication No. 85-23, revised 1985) were followed, as well as specific national laws (e.g. the current version of the German Law on the Protection of Animals) where applicable.

The managing editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or for failure to fulfil the above-mentioned requirements.

All articles published in this journal are protected by copyright, which covers the exclusive right to reproduce and distribute the article (e.g., as offprints), all translation rights as well as the rights to publish the article in any electronic form. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names are not protected by the relevant laws and regulations.

*While the advice and information in this journal is believed to be true and accurate at the date of its going to press, neither the authors, the editors, nor the publisher can accept anyl legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.*

*Special regulations for photocopies in the USA*

Photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee is paid. All fees should be paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0340-1200, the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

The Canada Institute for Scientific and Technical Information (CISTI) provides a comprehensive, world-wide document delivery service for all Springer-Verlag journals. For more information, or to place an order for an copyright-cleared Springer-Verlag document, please contact Client Assistant, Document Delivery, Canada Institute for Scientific and Technical Information, Ottawa K1A OS2, Canada (Tel: 613-993-9251; Fax: 613-952-8243; e-mail: cisti.docdel@nrc.ca).

This journal is included in the Springer Journals Preview Service. The Springer Journals Preview Service offers the tables of contents and BiblioAbstracts via Internet before the issue reaches the subscribers. Tables of contents are free of charge; BiblioAbstracts are available for a small annual fee. Details can be obtained by sending an e-mail message containing the line **help** to svjps@springer.de.

# Contents of Volume 75

Abdusheva GR → Miftakhov RN
Anastasio TJ: A random walk model of fast-phase timing during optokinetic nystagmus 1
Arbib MA → Schweighofer N
Arndt PA → Mallot HA
Arndt S → Carmesin H-O

Baan GC → Zandwijk JP van
Balázs L → Rozgonyi T
Baselli G → Porta A
Bauer H-U → Riesenhuber M
Bertrand D → Edelstein SJ
Bobbert MF → Zandwijk JP van
Boskov D, Heckman CJ: Motor unit recruitment patterns during reflex compensation of muscle yield investigated by computer simulations 211
Bülthoff HH → Mallot HA

Carmesin H-O, Arndt S: A neural network model for stroboscopic alternative motion 239
Carmesin H-O → Kruse P
Cartwright AD, Curthoys IS: A neural network simulation of the vestibular system: implications on the role of intervestibular nuclear coupling during vestibular compensation 485
Cavonius CR → Ganz RE
Celletti A, Villa AEP: Low-dimensional chaotic attractors in the rat brain (Addendum) 509
Cerutti S → Porta A
Chakravarthy SV, Ghosh J: A complex-valued associative memory for storing patterns as oscillatory states 229
Changeux J-P → Edelstein SJ
Chay TR: Electrical bursting and luminal calcium oscillation in excitable cell models 419
Cheng Z, Wasserman GS: Receiver operating characteristic (ROC) analysis of neural code efficacies. I. Graded photoreceptor potentials and data quality 93
Cheng Z, Wasserman GS: Receiver operating characteristic (ROC) analysis of neural code efficacies. II. Optic nerve action potentials and neural transmission 105
Cleland BG → Levine MW
Condon CJ → Ratnam R
Curthoys IS → Cartwright AD

Darlot C, Zupan L, Etard O, Denise P, Maruani A: Computation of inverse dynamics for the control of movements 173
Denise P → Darlot C
Dominey PF → Schweighofer N

Edelstein SJ, Schaad O, Henry E, Bertrand D, Changeux J-P: A kinetic mechanism for nicotinic acetylcholine receptors based on multiple allosteric transitions 361
Ehrenstein WH → Ganz RE
Elliott T, Shadbolt NR: A mathematical model of activity-dependent, anatomical segregation induced by competition for neurotrophic support 463
Etard O → Darlot C

Fell J, Röschke J, Schäffner C: Surrogate data analysis of sleep electroencephalograms reveals evidence for nonlinearity 85
Feng AS → Ratnam R
Fomin T → Rozgonyi T
Fukai T: Competition in the temporal domain among neural activities phase-locked to subthreshold oscillations 453

Ganz RE, Ehrenstein WH, Cavonius CR: Dynamic complexity of visuo-motor coordination: an extension of Bernstein's conception of the degrees-of-freedom problem 381
Geisel T → Riesenhuber M
Ghosh J → Chakravarthy SV
Giannakopoulos F → Mallot HA
Gnecchi-Ruscone T → Porta A
Groen F → Smagt P van der

Hain TC → Peng GCY
Heckman CJ → Boskov D
Henry E → Edelstein SJ
Heskes TM: Transition times in self-organizing maps 49
Hoppensteadt FC, Izhikevich EM: Synaptic organizations and dynamical properties of weakly connected neural oscillators. I. Analysis of a canonical model 117
Hoppensteadt FC, Izhikevich EM: Synaptic organizations and dynamical properties of weakly connected neural oscillators. II. Learning phase information 129
Huijing PA → Zandwijk JP van

Ikeura R → Kobayashi H
Inooka H → Kobayashi H
Itoh K → Yokoyama H
Izhikevich EM → Hoppensteadt FC

Kaplan E → Levine MW
Kerr GK → Wallace KR
Kobayashi H, Ikeura R, Inooka H: Evaluating the maneuverability of a control stick using electromyography 11
Köhn J, Wörgötter F: Corticofugal feedback can reduce the visual latency of responses to antagonistic stimuli 199
Kohonen T: Emergence of invariant-feature detectors in the adaptive-subspace self-organizing map 281
Kruse P, Carmesin H-O, Pahlke L, Strüber D, Stadler M: Continuous phase transitions in the perception of multistable visual patterns 321

Levine MW, Cleland BG, Mukherjee P, Kaplan E: Tailoring of variability in the lateral geniculate nucleus of the cat 219
Lörincz A → Rozgonyi T
Lombardi F → Porta A

Maas HLJ van der → Raijmakers MEJ
Malliani A → Porta A
Mallot HA, Giannakopoulos F: Population networks: a large-scale framework for modelling cortical neural networks 441
Mallot HA, Arndt PA, Bülthoff HH: A psychophysical and computational analysis of intensity–based stereo 187
Maruani A → Darlot C
Mazuka R → Yokoyama H
Meyers RE → Zbilut JP
Miftakhov RN, Abdusheva GR: Effects of selective $K^+$-channel agonists and antagonists on myoelectrical activity of a locus of the small bowel 331
Miftakhov RN, Wingate DL: Electrical activity of the sensory afferent pathway in the enteric nervous system 471
Miller R: Neural assemblies and laminar interactions in the cerebral cortex 253
Miller R: Cortico-thalamic interplay and the security of operation of neural assemblies and temporal chains in the cerebral cortex 263
Molenaar PCM → Raijmakers MEJ
Montano N → Porta A
Mukherjee P → Levine MW

Neven H, Schöner G: Dynamics parametrically controlled by image correlations organize robot navigation 293
Niwa S → Yokoyama H

Pahlke L → Kruse P
Paluš M: Nonlinearity in normal human EEG: cycles, temporal asymmetry, nonstationarity and randomness, not chaos 389
Peng GCY, Hain TC, Peterson BW: A dynamical model for reflex activated head movements in the horizontal plane 309
Peterson BW → Peng GCY
Porta A, Baselli G, Montano N, Gnecchi-Ruscone T, Lombardi F, Malliani A, Cerutti S: Classification of coupling patterns among spontaneous rhythms and ventilation in the sympathetic discharge of decerebrate cats 163

Raijmakers MEJ, Maas HLJ van der, Molenaar PCM: Numerical bifurcation analysis of distance-dependent on-center off-surround shunting neural networks 495
Ratnam R, Condon CJ, Feng AS: Neural ensemble coding of target identity in echolocating bats 153
Riesenhuber M, Bauer H-U, Geisel T: Analyzing phase transitions in high-dimensional self-organizing maps 397

Röschke J → Fell J
Rozgonyi T, Balázs L, Fomin T, Lörincz A: Self-organized formation of a set of scaling filters and their neighbouring connections 37

Schaad O → Edelstein SJ
Schäffner C → Fell J
Schöner G → Neven H
Schulten K → Smagt P van der
Schweighofer N, Arbib MA, Dominey PF: A model of the cerebellum in adaptive control of saccadic gain. I. The model and its biological substrate 19
Schweighofer N, Arbib MA, Dominey PF: A model of the cerebellum in adaptive control of saccadic gain. II. Simulation results 29
Shadbolt NR → Elliott T
Smagt P van der, Groen F, Schulten K: Analysis and control of a rubbertuator arm 433
Stadler M → Kruse P
Stroeve S: Learning combined feedback and feedforward control of a musculoskeletal system 73
Strüber D → Kruse P

Taylor JG: Breakthrough to awareness: a preliminary neural network model of conscious and unconscious perception in word processing 59
Thornber KK, Williams LR: Analytic solution of stochastic completion fields 141

Villa AEP → Celletti A

Wallace KR, Kerr GK: A numerical simulation of muscle spindle ensemble encoding during planar movement of the human arm 339
Wallace KR, Kerr GK: A numerical simulation of muscle spindle ensemble encoding during planar movement of the human arm: correlation sensitivity and parameter dependence 351
Wasserman GS → Cheng Z
Williams LR → Thornber KK
Wingate DL → Miftakhov RN
Wörgötter F → Köhn J

Yokoyama H, Niwa S, Itoh K, Mazuka R: Fractal property of eye movements in schizophrenia 137

Zak M → Zbilut JP
Zandwijk JP van, Bobbert MF, Baan GC, Huijing PA: From twitch to tetanus: performance of excitation dynamics optimized for a twitch in predicting tetanic muscle forces 409
Zbilut JP, Zak M, Meyers RE: A terminal dynamics model of the heartbeat 277
Zupan L → Darlot C
